EVOLUTION GLASS

THE NEWEST KILN FORMED GLASS

Evolution Glass incorporates a very unique feature, which no other textured glass has ever accomplished; it **EVOLVES**, it **CHANGES**, it **TRANSFORMS** from a clear panel to a textured architectural glass panel, and back to a clear panel.

This Evolution of a clear/textured/clear panel, all in one glass surface, could never before be accomplished with such precision and crystal clear appearance. What makes this architectural glass even more impressive, is that Nathan Allan created a brilliant technical program which allows us to form the glass, and also safety temper the glass.
