STONES GLASS

PRODUCT INFORMATION

Stones Glass by Nathan Allan, enters the A&D industry in "Rockin" fashion. To produce this uniquely formed glass, thousands of authentic glass pebbles are melted and fused together, to create a realistic aggregate surface. Stones glass is produced in crystal clear glass, with or without a smooth, cloudy, frosted finish. Further enhancements to the glass are added with a shimmering, mirror backing. Panel sizes can range up to 5'0 x 10'0, in annealed or safety glass options.
