WILLOW GLASS

PRODUCT INFORMATION

THE ART OF KILN-FORMED GLASS

Enhance your high-end designer project with glass Artwork unlike any other. "Willow" glass, designed with exclusive Freeform Series production by Nathan Allan, is our industry's first texture-less patterned glass.

Add some "Sizzle" to your walls or openings, doors or dividers. Impress your clients with the artistic, free flowing, 3-Dimensional shapes. "Willow" is today's current, trendy selection for the discerning designer.

AZ**

18 Large panels, 6'0 x 6'0, of Gemstone Cobalt Blue glass are pinned to a back wall surface, using a spider clamp attachment system. The Gemstone glass is 3/8" thick, safety tempered, and incorporates our Freeform Series Willow pattern.

The iridescent sparkle included in the Gemstone color mixture is revealed with front lighting, while the semi-opacity component of the color finish helps hide an unsightly back wall. The front lighting feature of this glass allowed for an inexpensive and effective lighting system, whereas back lighting would have been difficult and costly.

Collection: Josiah J

Series: Freeform

Texture: **WILLOW GLASS**

Glass Type: Gemstone Cobalt Blue

Dimensions: 6' x 6' x 3/8" thick

Client: **Hayden Ferry Lakeside LLC, AZ**
