DIASPHERE

PRODUCT INFORMATION

Dynamic spheres of glass are attached to one side of clear or textured sheets of glass, adding a new definition of "pop". The gravity defying orbs liven up a feature wall without obstructing light. Spheres are normally attached to one side only, but can be attached to both sides. Spheres can be attached to clear sheets of glass or kiln-formed textured sheets of glass. Pricing is based upon 1 Sphere per square foot surface of glass sheet. Nathan Allan artists will determine, upon the layout of the Spheres, how many Spheres will creatively look best. If artist deems that less or more Spheres are necessary, the client will be advised before production begins.
