

# MICROFIBRE TEXTURED GLASS

## PRODUCT INFORMATION

Microfibre Textured Glass is one of Nathan Allan's most popular intransigent, glass designs. Compressed and precise, clear raised dimensional lines are produced in combination with a more progressive, Sandstone texture. The effective contrast brings out the finer details of each texture, creating one of our Premium Classic Textures. With this fine Architectural design, Microfibre is often used in corporate settings, installed in office doors and Conference Rooms. Microfibre glass provides effective privacy, while allowing ample light transmission, and creating an interior design feature to highlight any space. Microfibre Architectural Glass is available in clear or low Iron glass, and large panel sizes. All panels are safety tempered.

Applications: Balustrade, Cladding, Dividers, Doors, Facades, Feature Walls, Lighting, Partitions, Windows

MAXIMUM PANEL SIZE		FEET	METERS				
Annealed or Tempered		5 x 10	1.5 x 3.0	* Some Directional Textures available up to 6'0 wide
